

Protection guaranteed!

A mattress protector is not an optional extra, it's an essential defence that no bed should be without.

We can't wash our mattresses as regularly as our bed linen (obv), but what with those weekend lie-ins with a cup of coffee and a good book there are bound to be some leaks and spills – especially when the kids come jumping in for their morning cuddle, too. It takes just one spill to leave an unprotected mattress with an indelible stain and a voided guarantee. Besides, on average, we lose up to half a litre of sweat and body fluid each night, and apart from causing unsightly stains, any moisture in your mattress also creates the perfect breeding ground for dust mites and bed bugs, mould and bacteria.

As the world's leading mattress and pillow protector brand, Protect-A-Bed® offers an affordable solution for a hygienic sleeping environment. Due to its waterproof properties, your mattress will stay clean

and remain stain-free from coffee spills and other liquid stains like adult incontinence and children's bedwetting, which ultimately will prolong its life and save you money. Protect-A-Bed®'s secret weapon is its Miracle Membrane™ —a patented material making the mattress protector 100% waterproof, but also 100% breathable and permeable – that is, perfectly comfortable, soft and absorbent. The Protect-A-Bed® promise is backed up with a minimum replacement guarantee (anything from two to 10 years), the only mattress protector brand to offer such assurance.
